OBJECTIVE

To obtain a good and responsible position in a professionally esteemed organization and looking forward to an opportunity where I can contribute to the organizational success and my personal improvement.

EDUCATION

ABES Institute of Technology   **2020 – 2024**
Bachelor of Technology in Computer Science   *Ghaziabad, Uttar Pradesh*

Bhaurav Devras Saraswati Vidya Mandir   **2019 – 2020**
Intermediate (PCM)   *Noida, Uttar Pradesh*

EXPERIENCE

MERN Stack Intern   **Orage Technologies, Noida**
March 2024 – June 2024

- During my academic journey, I had the privilege of interning at Orage Technologies, where I honed my skills in the MERN stack (MongoDB, Express.js, React, Node.js).
- Over the course of three months, I worked on several key projects that significantly enhanced my practical knowledge and experience.
- I am a proactive learner and a team player, always eager to explore new technologies and methodologies to stay current in the ever-evolving field of software development.

PROJECTS

Online Health Management Website | HTML, CSS, Bootstrap, JavaScript, ReactJS

- HTML: Utilized for creating the basic structure and semantic elements of the website, ensuring it is well-structured and accessible.
- Bootstrap: Integrated for responsive design, ensuring the website is mobile-friendly and looks good on various devices and screen sizes.
- JavaScript: Used for adding interactivity and dynamic behavior to the website, enhancing user experience.
- ReactJS: Used to create the frontend of the website.

Automated Toll Tax System | HTML, CSS, JavaScript,

- HTML: Utilized to create the basic structure and semantic elements of the web interface.
- CSS: Employed to style the web interface, ensuring a clean and user-friendly design.
- JavaScript: Used for adding interactivity and dynamic behavior to the web interface.

Multi-Step Registration Form | MongoDB, Express.js, React, Node.js (MERN Stack), JavaScript

- MongoDB: Utilized as the NoSQL database to store user registration data securely and efficiently.
- Express.js: Employed as the backend framework to handle API requests and manage server-side logic.
- React: Used to create the dynamic and responsive frontend of the registration form with smooth transitions between steps.
- Node.js: Leveraged as the runtime environment to execute server-side JavaScript code.
- JavaScript: Used for adding interactivity and dynamic behavior to the form, enhancing user experience.
